COST Action

GET TO KNOW ABOUT US

WE OFFER YOU SHORT-TERM SCIENTIFIC MISSIONS

Do not miss the opportunity to apply for Short Term Scientific Missions (STSM) if you want to visit another research organisation and develop a research collaboration that could take typically 2-6 weeks.

Your travel and accommodation costs will be reimbursed after you present the report with the results of the research. The objective of your STSM should be directly related to the topics of HyperChildNET.

Although this instrument is mainly addressed to Young Researchers, it is open to any professional affiliated to a legal entity in the eligible countries.

The 3rd call is open and applications can be sent through the eCOST platform until March 15, 2023. The period to carry it out the STSM is from May 1 to October 10, 2023.

NEW BP CALCULATORS

New calculators have been developed to support healthcare professionals to diagnose, monitor and treat high blood pressure, according to the 2016 European Society of Hypertension guidelines in children and adolescents.

Three online apps are available: OFFICE BP, 24-h BP and HOME BP. They are freely accessible on the HyperChildNET website.

VIRTUAL MOBILITY GRANTS

A new call for applicants is open until March 15, 2023 for professionals who may want to propose and implement specific research projects in the framework of HyperChildNET. The period to carry out the projects is from May 1 to October 10, 2023.

The Virtual Mobilities will allow to develop collaborative studies, European surveys, generate scientific publications and organising key awareness actions among others.

EVENT IN GREECE

We are organising a 2-day Meeting in Thessaloniki on March 30-31, 2023, which will include management meetings and workshops. You can join us in this hybrid event which will be held both virtually and in-person. Contact us if you want to participate.

ALL THESE POSTS ARE AVAILABLE IN OUR WEBSITE... DO NOT MISS IT!! www.hyperchildnet.eu

This COST Action is aimed at establishing a European sustainable and multidisciplinary network focused on acquiring a holistic understanding of the factors affecting high Blood Pressure in children in order to propose and implement corrective and preventive actions both globally and locally.

HyperChildNET - Network for blood pressure research in children and adolescents

Funded by the European Union
